

**Object: Regulation CE 1907/2006 of European Parliament and of the council concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH)**

**Foreword**

According to the present application of REACH regulation, we remind our customers that this is a dynamic regulation and therefore its application can be modified during the next years with reference to the importation, production and use of some substances. On this purpose customers will be promptly informed on any possible change for the substances in our products.

**Information related to products and contained substances**

Piattine e Profili S.r.L. supplies you with semi-finished products in stainless steel that, according to the documents for the interpretation of the Regulation developed up nowadays by the ECHA and the position of the most important national and European associations in this field, can be considered as “articles” according to REACH Regulation.

Moreover, we state that

- the substances contained in our articles are not released during their normal and sensible use
- the substances contained in the steel we work do not have the characteristics listed in Article 57. Therefore nowadays we do not need any authorization for them.

This said our customers do not have any obligation related to the registration of any of these substances.

**Information related to the position of Piattine e Profili S.r.L. towards REACH Regulation**

Piattine e Profili S.r.L. is a final user of the substances contained in the steels. These are subjected to registration as “phase-in substances”; their use in the production of stainless steel will be included in the use considered for their registration.

**Information related to the position of customers towards REACH Regulation**

Our customers, according to what here above stated, do not need any other compliance on semi-finished products in stainless steel for REACH.

Article 33, concerning the commitment of information of the substances contained in the articles, indeed is not applicable on our semi-finished products.
